

Good&Good boxes are 100% sealed, light weight, comfortable and of great use for every day. The silicon gasket closes the box so tightly that no smell or liquid will ever leave the storage box.

The silicon gasket and modern latches are so well engineered that you are guaranteed to easily open and close the box for a very long usage, in fact for over 500,000 closing cycles.

You can use our Good&Good boxes to keep food in the fridge or warm it up in the microwave oven.

NEW. ONE TOUCH

Its main feature is to let you close the cover without effort, and one hand only! By one touch!

The cover tightly closes the box and keeps it firmly fixed. You can then re-open it easily by pulling the specially designated area.

NEW. ONE TOUCH

The cover with special designed area lets open the box easily.

Special cover design allows you to close the box with one hand, just in one touch.

You can see the content of the box through transparent walls.

Grooves on the cover make easy to keep boxes as a one module installing one box on the top of the other. With grooves boxes do not slip and fall.

The Special design of the bottom lets the air come inside and keep food fresh longer.
